

Pathway: Urology referral

Doctor to complete the urology referral form via Patientsource

1. Clinic will be on EPR then type in Urology referral.
2. Ensure you complete the form and order the necessary investigations if required.
3. Discuss the referral with your team and enter on EPR that a referral has been made.

Once the referral is completed it will be added to the urology clinic tracker, which is located in Patientsource.

- Discuss with the Medical Team and in the nursing handover.
- Inform the relatives that a referral has been made.
- The referral will be triaged by Continence Clinical Nurse Specialist.
- All referrals will be discussed with Mr. Seth Urology Consultant.
- Any further information that is required will be requested from the referring Doctor.
- The clinic list will be sent out to the wards one week before the clinic date.
- Nursing and Medical Team should inform patients and relatives of the date and time, so that family can attend the clinic appointment.
